SUPPORTING EARLY LEARNING IN COOKHOUSE

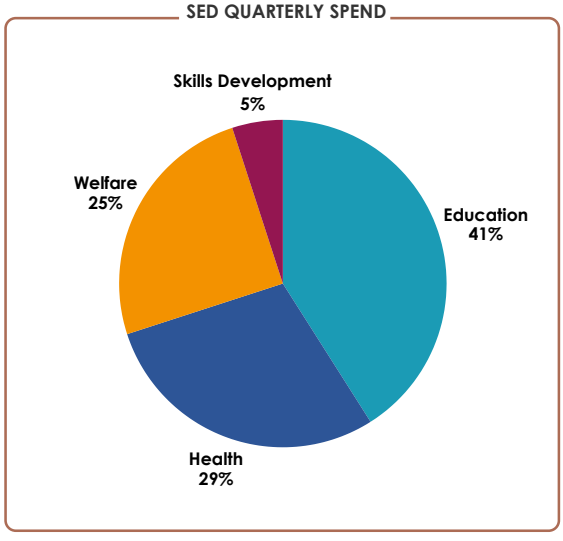

In partnership with ENEL, we proudly donated educational equipment to the Cookhouse Children's Foundation, a local Early Childhood Development (ECD) centre.

The donation included age-appropriate learning resources to help practitioners create engaging and interactive learning experiences for young children. These resources will support the development of essential skills, including early literacy, numeracy, creativity, problem-solving and motor coordination.

By strengthening the centre's learning environment, the initiative aims to help prepare children for the transition to formal schooling while laying a strong foundation for lifelong learning.

This collaboration reflects a shared commitment to inclusive education and sustainable community development, recognising the importance of investing in children during their formative years.

CELEBRATING WOMEN IN OUR COMMUNITY

We recently hosted a community event celebrating the strength, resilience and contributions of women in the Cookhouse community.

The gathering brought women together to connect, share experiences and recognise the important roles they play in their families, workplaces and communities. It also provided an opportunity to reflect on the importance of empowering women and creating opportunities for them to participate meaningfully in social, economic and community development.

Through initiatives such as this, Cookhouse Wind Farm continues to support women's empowerment and promote inclusive community development. By recognising women's contributions and creating spaces for connection and inspiration, the initiative highlights the value of building communities where women and girls are supported to develop their potential and thrive.
